

VoIP Systems

In order to install and operate the REVCORD VoIP Voice Logging System, there are a few minimum requirements for the hardware that will be running the software and logging the calls. Below is a basic list of requirements for both Dell and HP systems.

HP	Channels	Server
Basic	1-100	HP DC5750 (or equivalent)
Intermediate	101-300	HP ProLiant DL320 G5p Server
Advanced*	301-300	HP ProLiant DL380 G5 Server (dual hot swappable fans and power)

DELL	Channels	Server
Basic	1-100	Dell Optiplex (or equivalent)
Intermediate	101-300	PowerEdge 2950 III Series Server
Advanced*	301-300	PowerEdge 2950 III Series Server (Upgraded to match Specifications)

All Operating system must be 32 bit in order to run REVCORD software.

*On the Advanced, the Ethernet must be GigE
